

3 Life-Changing Days, Over 40 World-Renowned Health Experts... and 1 Exclusive Spot Just for YOU

Subhead: 1 in 2 Americans will suffer from a chronic diseases like cancer, heart disease, and diabetes...but it doesn't have to be YOU. If you seek the truth, question "standard care", and value your health freedoms, this is the *ultimate* educational opportunity for you.

Dear Fellow Truth Seeker,

Ty Bollinger here (founder of TTAC) with a rare opportunity you can't afford to miss.

You see, over a short span of time not too long ago I lost seven different family members to cancer, including my mother and father.

Devastated -- and frankly angry that so few solutions seemed available to help them, and those that were available often did more harm than good -- I decided to do something about it.

I set out on my own personal Quest to discover the truth about cancer... the methods to avoid it, and to beat it, that had proven successful throughout the world but that no one was hearing about (often because certain powerful institutions didn't want people to know about them.)

The result: great hope, even in the midst of my grief, that what happened to my family would not have to happen to others. Cancer can be avoided, and cancer can be beaten, on a *much* wider scale than it is today if people had access to this knowledge, I realized.

The result of that? The Truth About Cancer docu-series, website, and community that has now helped millions worldwide!

And on a personal level, **my Quest for answers empowered me to overcome my grief and eradicate my FEAR of cancer -- and other diseases, too -- through a new understanding of healing and personal growth.**

So now it's YOUR turn to fulfill your quest for real answers that will truly help you.

As you know, when you reach a certain age—and especially if you or a loved one have battled, or are battling, serious chronic health challenges like cancer—REAL answers to your health challenges are priceless.

And you also know...

Investing in your health and education is the most powerful thing you can do to prevent disease and live a long and meaningful life.
